Message from EiC

As GenoMed Connect enters its next volume in 2026, I am pleased to share the progress and direction of the journal. Following the successful completion of our initial volumes, the journal has established a strong foundation in publishing high-quality, peer-reviewed research at the intersection of genomics and medicine.

During 2025, we adopted a continuous publication model, strengthened our editorial and peer-review processes, and published articles covering genomics, precision medicine, and translational research. These developments have helped us improve efficiency, quality, and transparency.

Looking ahead to 2026, our priority is to further enhance research quality, maintain high ethical standards, and prepare the journal for indexing milestones. We warmly invite researchers, clinicians, and early-career scientists to contribute as authors and reviewers and to join us in advancing genomics-informed medical research with real clinical relevance.

Aims and Scope

GenoMed Connect is an interdisciplinary, peer-reviewed, open-access journal dedicated to advancing the integration of genomics and medicine. The journal serves as a platform for researchers, clinicians, and scientists to share their findings and insights in the rapidly evolving fields of genetics and genomics.
